## Designed for the Rider who cannot stand during Crew Changes

The X-904 Emergency Seat is a hanging seat that clamps to the upper lift frame of any X-904. This upper clamp device enables it to quickly attach or detach when needed. This device is NOT designed for everyday Personnel Transfers. The functional design is to enable a person who is sick or injured, such that standing during transfers is not advisable. This seat can also provide a medic with the opportunity to sit adjacent to a stretcher during transfers. Given the simple scissor clamp connection point the X-904 Emergency Seat can be used on all X-904 and X-1000 Personnel Transfer Devices.

## Key Design Features

- Compatible with all X-904 and X-1000 Personnel Transfer Devices
- 18 oz Orange vinyl seat cover
- Adjustable back strap for support
- Durable PVC 450 reinforced seat base
- Cushioned Stainless Steel Spreader bar
- Easily attach to top frame with scissor clamp

Emergency Seat
